Customer  Representative

We acknowledge copies of the Sales & Installation Order, Cardholders Agreement, Rescission Notice, Sales Slip and/or Cash Receipt if applicable.

We acknowledge that there are no other incentives or merchandise, not mentioned or promised by the representative or the Company to facilitate this purchase.

**\*\*GDS Platform of Products are the only products guaranteed to remove H2S\*\*.**

Name:

**SUB-MICRONIC TURBIDITY**  
**AKA “Murky” or “Cloudy” Water**  
**CONTAMINATION NOTICE AND DISCLAIMER**

SUB-MICRONIC TURBIDITY are mud particles so small they do not settle in water and the water becomes MURKY or CLOUDY. Sub-Micronic Mud is rare in wells as it is normally associated with lakes or other surface waters. The only product which will clear Sub-Micronic Turbidity is the Nation's Pure TCS (TURBIDITY CLEARING SYSTEM)

THE PRODUCT LISTED ON THIS DOCUMENT IS **NOT** THE TCS SYSTEM REFERENCED.

- ☒ Customer is certifying the water is not murky or cloudy at the time of this purchase.
- ☒ Customer acknowledges that our representation of your product purchase did not infer, imply, or in any way claim that your product purchase has anything to do with murky, cloudy sub-micronic water.
- ☒ CUSTOMER ACKNOWLEDGES THAT ADDITIONAL EQUIPMENT AND CHARGES FOR ADDITIONAL EQUIPMENT ARE REQUIRED IF YOUR WELL DEVELOPS SUB-MICRONIC TURBIDITY.

CUSTOMER ACKNOWLEDGES RECEIPT OF THIS DISCLAIMER.

# Nation's Pure Service, Maintenance and Customer Support Plan

- 1) All Service Plans are "Plans" and not contracts. Customers are free to participate on an ongoing basis or perform your own service.
- 2) All Plan benefits are subject to customer tendering funds for services **when services are performed.**

## ☐ REGULARLY SCHEDULED MAINTENANCE SUPPORT PLAN

Filters for your Reverse Osmosis should be changed in 6-month intervals. The Good Water Maintenance charge is \$199.00 due at the time of service for a set of three filters (additional filter sets are \$75.00 each, does not include membranes). When the filters are changed you will also receive 3 bags of salt, if you have a salt using product, and a complete system check. For the 6 months following a filter change at Good Water Maintenance Visit, if service is required for your system, there will be no service call charge when scheduled on a regular schedule for your location. Under no circumstances are the benefits of no charge salt or no charge service applicable without paid filter changes.

## ☐ TEXAS SERVICE PLAN

Certain areas of Texas, service is offered at limited and designated times and days under the terms of the above mentioned service plan as modified in this section. Should service be requested outside of these designated times and days for designated areas, trip charges plus regular service fees apply. In other words, we offer the same benefits stated in the paragraph above, with the exception that Nation's Pure will offer this service in your area on designated days only. Service other than designated days will result in service and or travel charges to your location.

\_\_\_\_\_

Services requested that result in causes not related to equipment including - but not limited to - power outages, water supply outages, freezing, or tampering are billable at regular services rates applicable to all uncovered aspects of service plans. Service schedules for regular maintenance are performed on dates and times offered by the company. Custom times will be chargeable.

Requests for additional salt, beyond what is provided at the time of filter services, are customer's responsibility. Any salt deliveries, by themselves, are not covered by any service plan; service charges will apply for said deliveries. Interruption in supplies, for any reason, nullifies the company's responsibility to provide those same supplies.

Prices for all plans are subject to change without notice.

All "Plans" apply to service and service supplies but not equipment warranty parts as covered in specific equipment warranties.

**\*\*Labor for Warranty Media replacements, if ever needed, are not included under "Free Service" provisions of any service plan offered or provided.\*\***

Service recommendations made that are declined by the customer which then later requires a return visit to keep equipment operational will incur a service charge regardless of current plan participation.
